RE: Operations Advisory – Alpha Paging System test

The Site Security Operations Center will be conducting a test of the incident paging system for the Project at the UASTP on Wednesday 08/18/2021 from 9:00 am – 9:30 am. This test is undertaken semiannually to confirm contact information. Occupants receiving pages are asked to please follow instructions on the test page so Site Security can verify the information is being received correctly.

If you should have any questions, please do not hesitate to contact Heather Head at OccupantServices@uastp.com. In addition, please visit www.uastp.com to stay informed on recent operational advisory announcements.

Thank You.
