RE: Operations Advisory – TEP Repair Activity

Please be advised TEP will be conducting unplanned repairs on a failed cable outside of the Tech Park but impacts the A and B circuits starting tonight. They will be de-energizing power to the 'A and B' feeds and switching to the 'C feed' starting Monday May 12th at 11:30 PM until the following morning about 5:30 AM Tuesday May 13th.

During this TEP repair window, the Site will not have redundant power feeds.

Occupants are encouraged to reduce as much load as possible during this period by supercooling occupied spaces beforehand (After 8:00 PM) and reducing cooling loads for unoccupied spaces by raising setpoints.

Optionally, Occupants with full building load generators may choose to operate them during this period. If you have any questions, please contact Omar Jacobo at (520) 300-1835.
