

From Jacobs Contract Operator:

Please be advised:

Weather permitting, On **August 23, 2026 through September 3, 2026** Contract Operator, Jacobs CO, will be performing asphalt maintenance on the **9060/9070 Access Drive and the 9030/9040 Access Drive**. During this time, the indicated drives and parking lots will be closed. **Please be aware, drive slowly, do not walk through work areas, note alternate routes and note alternate parking.**

Do not walk or drive through any barricaded work area. The closures apply to both pedestrian and vehicle traffic. Fresh asphalt, construction equipment, uneven surfaces, and active work operations present significant safety hazards.

Follow all posted signs, detours, and instructions from onsite personnel, and use only designated alternate routes and parking locations.

Asphalt work requires favorable weather conditions for applications to set properly. The listed date may have to be adjusted to accommodate weather conditions.

Occupants should plan their work schedules accordingly.

Please be mindful of workers and equipment in the area and observe any area blocked off with signs, cones, or barricades.

Please see the maps attached for details.

If you have any questions, please do not hesitate to contact Clinton Pearson at OccupantServices@uastp.com.

In addition, please visit www.uastp.com to stay informed on recent operations advisory announcements.

Thank you.
